PRODUCT SPECIFICATION

Product Name: Cold Pressed Carrot Juice

Packaging Sizes: - 1 Lt plastic

Storage Conditions: 0-5 0 C

76% Carrot Juice, 22% Apple

Ingredients: Juice, 2% Lemon Juice,

Antioxidant (Vitamin C)

Shelf Life Range: 14-40 days

Latest Product Spec. Update Date: 08/04/2024

Carrots

We select seasonal 1st class Italian carrots for juicing, which have a smooth milky flavour. A bit of Apple & Lemon Juice is added to bring down the pH to a safe level. Fresh carrot juice has a shelf life of only 2 days, so to extend it, the juice undertakes a process called HPP: High Pressure Processing, a non-thermal pasteurization which removes dangerous bacteria and allows the juice to last longer.

Main hazards associated with the product	None
Physical or chemical properties that impact food safety	None
Contains allergens	None
May contain allergens	None
Storage conditions	Cold room set between 0°C < Temp < 5°C
Distribution conditions	Chilled transport 0°C < Temp < 5°C
Instructions for use (storage and preparation)	Store in fridge <5°C / Once opened consume within 2 days
Potential misuse by customers	Left out in warm temperature causing shelf life to decrease. This causes natural fruit fermentation with a rare risk of the cap blowing off the bottle due to the increased pressure

Overview of treatment and processing	 The produce arrives, goes into quality control and sorting procedures. Then it's placed into cold rooms set at 3°C-8°C The fruit is then washed and scrubbed with fruit washing chemicals, finishing off with a rinse of cold water before it gets processed Then it is taken to the correct production line and passed through the juicing machine. The ingredients are blended together to create the correct recipe The juice is then filtered twice, once at 500 µm and then with a finer filter at 300 µm Brix, pH, flavour and colour tests are then carried out and if quality control is passed, filling will take place. The juice only gets filled when the temperature of the liquid is between 0°C < Temp < 5°C Once the product is filled, the juice undergoes the HPP process The final product in then transported to our distribution warehouses (transport is in refrigerated vehicles 0°C < Temp < 5°C) and it's ready for clients to collect once we have completed our goods in checks 		
Brix Level	9-12		
pH Level	3.80-4.20		
Id	entify intended use		
Consumer target groups	General public		
Suitability for vulnerable groups:			
- Young children	Suitable		
- Pregnant women	Suitable		
- People who are ill	Suitable		
- The elderly	Suitable		
- Allergy sufferers	Suitable
