*Further Information about suitability for Vegetarian and Vegan diets

There is no legal definition of the term vegan, but the Food Standards Agency (FSA) provides voluntary guidance on the use of the terms vegetarian and vegan in food labelling, including advice about cross-contamination. They suggest that manufacturers, retailers and caterers should be able to demonstrate that foods presented as "Vegetarian" or "Vegan" have not been contaminated with non-vegetarian or non-vegan foods during storage, preparation, cooking or display.

The Vegan Society is not against foods labelled as Vegan also carrying a "may contain" warning about animal allergens. (Ref. www.vegansociety.com Home> Lifestyle>Nutrition and Health > Allergen Labelling).

In conformance with the Labelling Legislation art.21 (EU) 1169/2011 products suitable for "Vegans / Vegetarian" may not be suitable for people with allergies. Vegans avoid exploitation of non-human animals, whereas people with allergies need products that do not contain the allergens that affect them.

La Tua Pasta Ltd conducted an Allergen Risk Assessment and decided to keep the statement "<u>Produced in a factory that handles Wheat, Egg, Milk, Nut, Mustard, Crustacean, Fish, Celery and Soy.</u>" because it is not feasible to perform a wet cleaning of the full production's line after every allergen change.

Production planning schedule and Clearance procedures are in place to eliminate the risk of mixing "Vegan / Vegetarian" and "Non-Vegan / Vegetarian".
